

Cabin construction The control centre for your vehicles

GMEINDER LOKOMOTIVEN design and build driver's cabins and operating panels according to your drafts to match your requirements.

Our cabins are manufactured both as steel frame construction as well as plate edge construction – individually according to your demand.

GMEINDER LOKOMOTIVEN supply cabins for construction, agricultural and forest machinery, industrial trucks and locomotives as well as special purpose vehicles.

Together with our long-term partners we offer you design, construction and prototyping up to the relevant tests like ROPS, FOPS, TOPS and OECD from one source.

Good ergonomics, accurate interior fittings, best corrosion protection and high manufacturing quality as well as customer-oriented service are a matter of course for us.
